

Smart Band User Guide

Wearing Method

Best to wear the band after the styling of a hair.

Please fit the adjusting holes according to your wrist size, and then do up the wristband buckle.

The sensor should cling to skin to avoid movement.

Charging the band

Please ensure the band has enough battery at your first time using it. Please charge the band first if it can not be powered on, and then the band will automatically start working.

Charging method.

Install the band APP on the phone

To download and install "Yubo Band", pls scan the QR code below, or search in APP Store.

System requirements: Android 5.0 and above; IOS9.0 and above; Bluetooth 4.0 support.

Handle the band to APP

For the first time using the band, please connect it to the APP to calibrate the time and date, otherwise the pedometer and sleeping monitor will not be accurate. The band will automatically be synchronized when successfully connected.

Open the QR code and click the My device link
 Pull down to scan device
 Click on the device to handle the band to APP

After the band is bundled to APP successfully, the APP will save the personal info, search and connect the band automatically if the APP is opened or running in the background.

Pls ensure the band has all the required permissions or its system during installation or set the permission of your phone's system settings, such as running in background and reading contact information.

APP functions and settings

Personal information

Please set personal information after entering the APP. Settings – personal settings, you can set the age – height – weight to ensure the accuracy of distance and calorie calculation.

You can also set your daily exercise and sleep goals and monitor daily completion.

Please set secondary reminder time, you can also turn off this feature in the message notification.

Message notification

In the connected state, if the incoming call reminder function is enabled, the band will vibrate when there is incoming call, and the band will automatically start working.

Smart Band Display

2 seconds countdown. Please allow APP to access the camera and photo album to take and save the selfie.

Band display instructions

Date and Clock
After synchronized with the phone, the date and clock on band will automatically be calibrated.

Pedometer
Wear a band to automatically record your daily activity. You can view the real-time steps today.

Distance
Based on the number of your daily activity and your personal profile, the distance you traveled will be displayed.

Calories
Based on your walking distance and your personal profile, the calories burned will be displayed.

Heart rate, blood pressure
Switch to the heart rate or blood pressure interface, the band will automatically start measurement, and the result will be displayed in 40 seconds. This feature is only supported if the band has heart rate or blood pressure sensor.

Sleep mode
The bracelet will automatically monitor your sleeping status in night, it will detect your sleep status with deep sleep / light sleep / awake times, calculate your sleep quality; the result can be checked on APP.

Note: The band will track sleeping status only when you wear it during your sleep in night. Place the band somewhere that will not get the sleeping monitor.

Please synchronize your band with APP after 9:00am the next day to upload the data before you can check it.

Specifications

Device type	Smart band	Battery	Lithium polymer
Supporting system	Android	Connectivity	Bluetooth 4.0
Working voltage	~3.7V ~ 3.8V	Screen	Low-power 0.96 inch
Screen Resolution	62x44	System Requirement	iOS 9.0 above / Android 5.0 above

Notices:

- Take off your band before having shower or swimming.
- Place connect the band when synchronizing data.
- Use the 5V USB charging adapter.
- Do not expose the band in high moisture or extreme high temperatures.
- When the APP crashes or reboots, please check the phone memory, clear it and try again, or exit the app to reopen it.

Components

- Host * Wristband * Charging cable * Packing box and manual
